

**Candidates for the 2021 FDA Board include the following:**

**Christine Petersen:**

As Grants Chair, I get to deal with people trying to make the Fan and RVA better. How lucky am I! I am also a Senior Advisor at the Smithsonian's National Museum of American History, the new President of the FWC and a Board of Trustee for the Richmond Public Library. The most important thing about me though is that I'm the grandmother of twin 2 year boys who live over in the Museum District. My husband and I love being part of their lives and when we are not with them, we enjoy traveling and all the things RVA has to offer.

**Rebecca Keller:**

Rebecca has lived in the Richmond area for about 30 years. She moved to the Fan 3 years ago with her husband Brian and several pets. They have four grown children, two still in the area, and two grandsons. She is enjoying bringing some life back into their new, somewhat neglected Fan home. She enjoys swimming, being outside, and seeing friends, which were missed dearly this past year. She currently works at McKesson Medical as a Strategic Account Manager.

**Christy Lantz**

Christy Lantz is an art teacher at Riverside School in Bon Air. She is married to Michael Lantz and has two wonderful adult children, Alex and Addie. She loves her life in the Fan and looks forward to seeing everyone at the fantastic FDA events.

**Ted Theofanos**

Ted Theofanos moved back to the Fan in 2008 with his wife and, at that time, two young children. The Fan has been part of his life since childhood either as a landlord's son (painting and cleaning between tenants) or as a post Virginia Tech apartment dweller himself, to current proud renovator and single family home resident. Ted is in the IT field and has been for almost 25 years and works mainly from home for a large government contractor in the DC Metro area. He and his wife Stephanie have been proud to send their children, Stamate and Olympia through RPS and on to Maggie Walker Governor's School, and this fall to Purdue University for Stamate. He has served on the FDA board previously and is excited for another opportunity to carry forward the mission of the FDA.....the preservation, restoration, and betterment of our urban community.
